

*Please moisten the Stopper
before inserting in the bottle*

*Please moisten the Stopper
before inserting in the bottle*

THE APOLLINARIS COMPANY, LIMITED, beg to call attention to the above Stopper, which has been specially designed for recorking Apollinaris bottles, the contents of which have been partly used, and by which great economy can be effected.

Apollinaris Water, recorked with this stopper, is preserved fresh and sparkling for several days.

Price 1/- each, postage free.

DIRECTIONS FOR USE.

Place the first and second fingers under the lever *ff*, and press down the knob *d* with the thumb, thus stretching the rubber, when it may be easily passed into the neck of the bottle.

The ring *b* now forms an air-tight closure, while the upper ring *c*, resting on the mouth of the bottle, keeps the stopper tight in position.

To remove the stopper simply raise the lever *ff*, with the first and second fingers, while keeping the thumb on the knob.
